Take the pen and paper away from your servers and put an iPad Mini in their hands. Our portable ordering device encloses the iPad Mini with a secure credit card swipe to accept transactions. Orders can be taken directly from the table so servers don't have to go back and forth between the main terminal and the kitchen.

**Portable Ordering Device**

Servers take customer orders directly at the table with an iPad Mini

**Tablesider Ordering**

Engage customers with a progressive technology that allows orders to be taken directly at the table and sent immediately to the kitchen.

**Security**

Customers can feel secure that their credit card data is safe as soon as transactions are processed in front of them.

**Convenience**

Send orders and accept payments right from the table.
